July 20, 2022

[redacted]

Dear [redacted]

Re: You are entitled to the information you requested - 2022-00956-HEA

The Department of Health and Wellness received your application for access to information under the *Freedom of Information and Protection of Privacy Act* (the Act) on June 20, 2022.

In your application, you requested a copy of the following records:

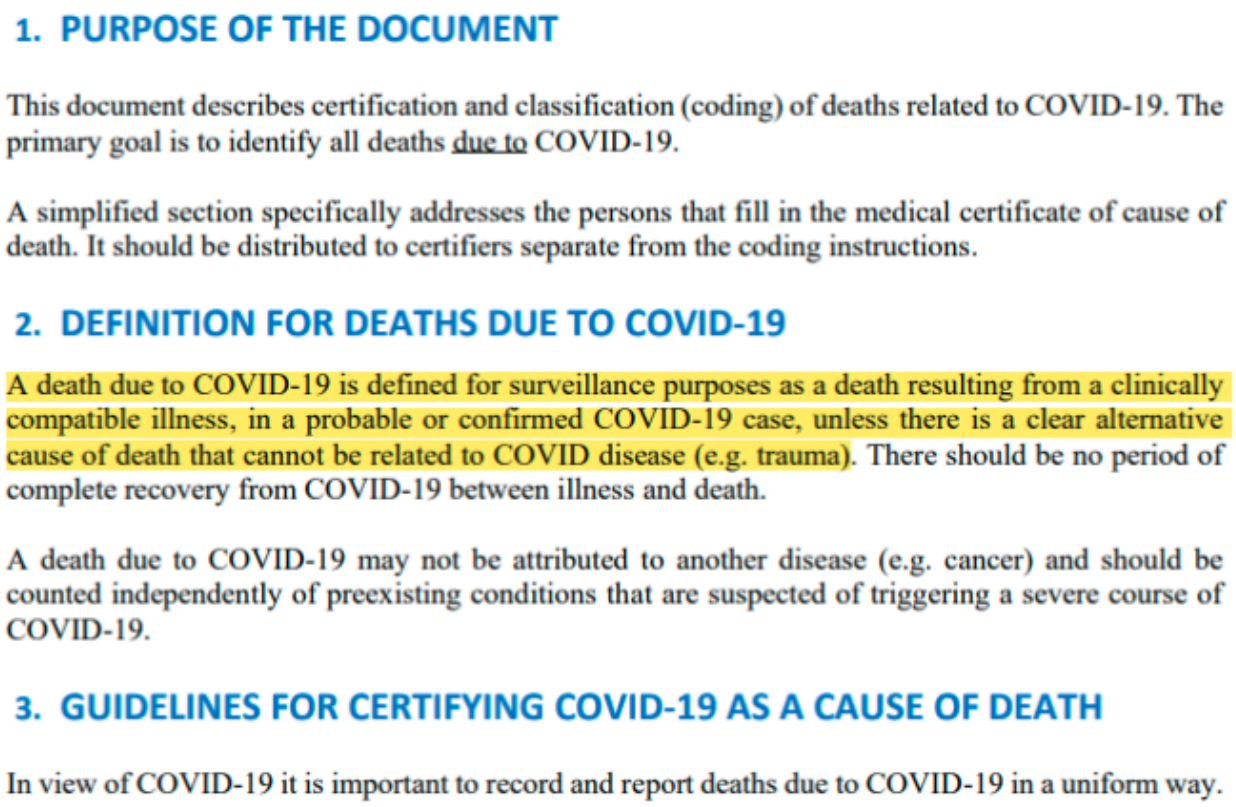
> *The demographic and place of residence data for Nova Scotians who died from COVID-19 since January 1, 2022. Date of death. Vaccination status.*

Responsive records have been located and are attached.

People in Nova Scotia continue to dig for information about this so-called pandemic. The full listings to date are below. This piece involves official death statistics in that area.

> The demographic and place of residence data for Nova Scotians who died from COVID-19 since January 1, 2022. Date of death. Vaccination status.

Before getting into the statistics, a few disclaimers are needed. The most obvious of which is that no virus has ever been proven to exist.



1. PURPOSE OF THE DOCUMENT

This document describes certification and classification (coding) of deaths related to COVID-19. The primary goal is to identify all deaths due to COVID-19.

A simplified section specifically addresses the persons that fill in the medical certificate of cause of death. It should be distributed to certifiers separate from the coding instructions.

2. DEFINITION FOR DEATHS DUE TO COVID-19

A death due to COVID-19 is defined for surveillance purposes as a death resulting from a clinically compatible illness, in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma). There should be no period of complete recovery from COVID-19 between illness and death.

A death due to COVID-19 may not be attributed to another disease (e.g. cancer) and should be counted independently of preexisting conditions that are suspected of triggering a severe course of COVID-19.

3. GUIDELINES FOR CERTIFYING COVID-19 AS A CAUSE OF DEATH

In view of COVID-19 it is important to record and report deaths due to COVID-19 in a uniform way.

> A death due to COVID-19 is defined for surveillance purposes as a ***death resulting from a clinically compatible illness, in a probable or confirmed COVID-19 case***, unless there is a clear alternative cause of death that cannot be related to COVID disease (e.g. trauma). There should be no period of complete recovery from COVID-19 between illness and death.

This has been covered before, but is worth a going over. The definition of a "Covid death" is nothing short of fraud. The original has been moved or deleted, but the archive is still available.

It's also interesting that a "Medical Officer of Health", who doesn't even practice, is able to overrule local authorities in determining the cause of death. These deaths can also be attributed to "Covid" as long as there is believed to be some contributing factor. Pretty subjective.

Now, onto the data provided by Nova Scotia:

MONTH	DEATH TOTAL
January 1 -31, 2022	67
February 1 – 28, 2022	61
March 1 – 31, 2022	44
April 1 – 30, 2022	85
May 1 – 31, 2022	65
June 1 – 20, 2022	13
TOTALS	335

# OF SHOTS	DEATH TOTAL
0 (Purebloods)	58
1	9
2	96
3 or more	172
TOTALS	335

The FOI response adds in a disclaimer that no real conclusion can be drawn between vaccine efficacy and other factors. One would think that they don't want people thinking these shots are useless (at best) or harmful (at worst).

SEX	DEATH TOTAL
Male	189
Female	146
Combined	335

Seems that none of the other 167 genders have fatalities to report in this deadly pandemic. What a strange observation we have here.

AGE GROUP	DEATH TOTAL
0 – 9	0
10 – 19	Less Than 5
20 – 29	0
30 – 39	Less Than 5
40 – 49	7
50 – 59	13
60 – 69	33
70 – 79	86
80 – 89	125
Over 90	69

The overwhelming majority of deaths are people who have had at least 2 shots. The majority are also seniors 70 years of age and older. Keep in mind, Nova Scotia has a population of approximately 1,000,000 people. Even if 1,000 people were to have died (with a direct causal link), it would be only 0.1% of the population. And we see just how flexible these people are with their definitions.

It's almost as if there's no virus, and that there's no discernible health benefit to taking these experimental vaccines.

As a reminder, the WHO said in its March 2020 guidance (page 3), and September 2020 guidance (page 8) that virus isolation is not recommended for routine diagnostic procedures.

And if you haven't seen Christine Massey's work with Fluoride Free Peel, go do that. There are some 200 or so FOIs showing that no one, anywhere in the world, has ever isolated this "virus". It's never been proven to exist. There's no point having a discussion on what treatments are beneficial, until the existence of this is demonstrated. Other interesting reads

are apocalypticyoga, by Bill Huston, Stormhaven, by William Ray, and What's Up Canada by Wayne Peters.

Another patriot who has obtained hundreds of pages of damning evidence against the public health authorities of NS is Canadian Military Veteran, William Ray (Stormhaven Media) at https://stormhaven.blog/. His research is impecable and he is very informed on a number of issues that plague Canadians.

Death count in New Brunswick is @ 462 [but how can we really know the truth about these # s ?]

Canucklaw– you should do some inspiration tshirts so people can find you. .. good example here: https://coreys-digs.creator-spring.com/listing/faith-not-fear-2021?product=95
